IF IT CAN'T BE DONE SAFELY, IT WON'T BE DONE

Safety is our number one priority. If it can't be done safely, it won't be done. For our people and for you, nothing matters more.

Mark Keily
QHSE Director

We are proud to be regarded as world class leaders in safety, achieved through our dedicated HSQE teams and rigorous processes and controls.

Our key values include 'Safe' and 'Responsible' - and this is led from the very top, all the way throughout our business. We all do everything we can to keep everybody 100% safe, all of the time. We also do all that we can to deliver maximum quality for you, with zero risk, and with minimal impact to the environment.

To make this happen, we have a dedicated Performance Standards team. We also open up our business to a continuous and rigorous programme of external audits, to provide you with peace of mind that you can trust us to deliver.

Health and Safety Management

Our management systems have been certificated to ISO 9001:2015, ISO 14001:2015, ISO 27001, ISO 45001:2018 and ISO 50001:2018, confirming our robust safety and quality management system.

Health and safety is a fundamental driver of our business and we make huge investments to develop initiatives internally and externally. We ensure that our employees are competently trained for their job role and work alongside our customers to develop safety initiatives to drive throughout their businesses.

SPECIALIST EXPERTISE

Sunbelt Rentals is the largest and most environmentally conscious rental solutions provider in the UK.

We are a powerhouse of market-leading specialist businesses. Our unique portfolio delivers outstanding project solutions as one team for our customers.

YOUR SUNBELT RENTALS TEAM

When you work with Sunbelt Rentals you have access to industry-leading experts from across the business.

However, to keep things simple you'll also have your own account management team who understand what's most important to you and can manage the day-to-day, so you don't have to.

Dedicated Hire Desk

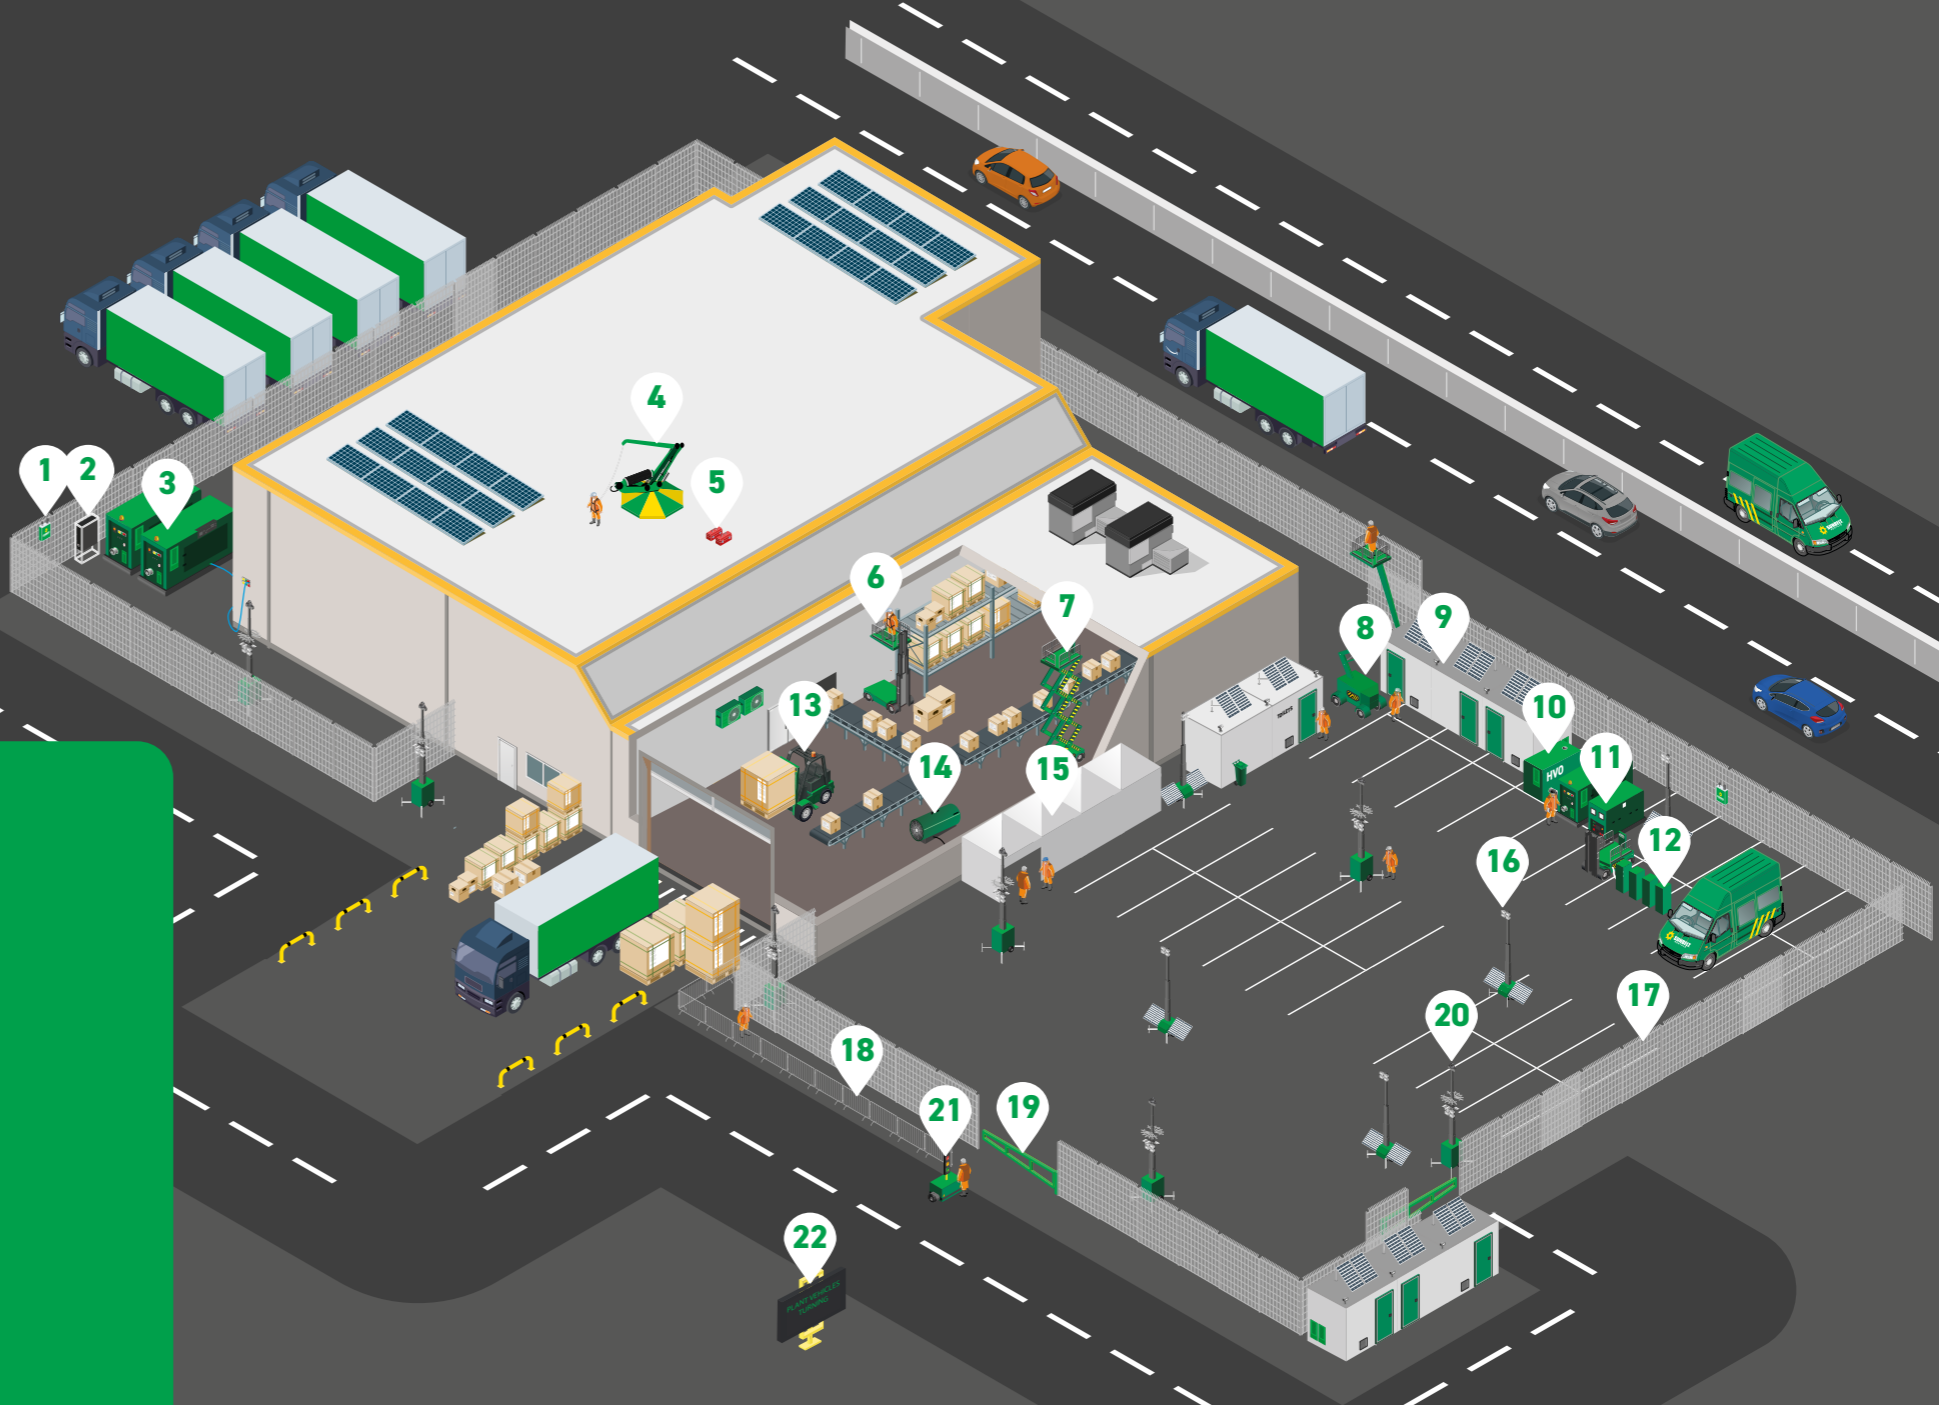

To provide the highest service levels and quickest response times you'll have a dedicated hire desk, manned by experts with deep product knowledge.

- Single point of contact
- Experienced and dedicated team
- Fast response and resolution times
- 24/7 out of hours support
- Understanding of your account service level agreement

A COMPLETE SITE SOLUTION

- 1 Environmental Monitoring Stations
- 2 Energy Management System
- 3 Contingency Power
- 4 Mobile Man Anchor System
- 5 Small Tools
- 6 Low Level Access
- 7 Scissor Lifts
- 8 Articulated Boom Lifts
- 9 Temporary Welfare & Storage Facilities
- 10 Fuel Management
- 11 Clean Energy Solutions
- 12 EV Charging Stations
- 13 Forklift Truck
- 14 Climate Control
- 15 Temporary Structures
- 16 Solar Lighting
- 17 Fencing & Barriers
- 18 Pedestrian Barriers
- 19 Swinging Arm Barriers
- 20 CCTV
- 21 Temporary Traffic Lights
- 22 VMS Board

GREENER LIGHTING SOLUTIONS

We're committed to investing in sustainable equipment that helps you reduce your carbon footprint. We're proud to offer the UK's largest and most fuel efficient range of tower lights.

9m LED Tower Light Solar Battery

Our fully solar lighting towers encompass the latest technology to provide you with continuous lighting, with no power source other than the sun.

- Stabilisers, telematics, sensors and lockable control panels for added safety
- Zero emissions, zero noise, zero fuel – the greenest option available on the market.
- Light doesn't diminish as the battery fades providing full LUX capacity at all times.

X-Chain Plug-In Lighting Tower

No fuel, no noise, no emissions.

Use mains connection or an alternative power source to light up your site with the Trime X-Chain plug-in light. Compact, easy to transport and producing safe, bright lighting. Up to 10 lighting units can be linked together from a single power source.

LIGHTING

Powerful and portable lighting solutions are ideal for illuminating areas on site where there is no, or insufficient, natural light.

Our range extends from smaller lighting products such as festoon lights, fluorescent lights and tripod lights to the very latest tower lights suitable for larger sites, roadside lighting or use at events.

Our fleet includes some of the most environmentally advanced and quietest tower lights currently available, which offer a multitude of eco-friendly features and are economic to run with no need for refuelling for several days.

CLIMATE CONTROL

We supply the most modern, clean and safe heating, drying and cooling equipment in the industry, all backed up with a high-quality service. Our range of products are sourced from leading manufacturers with nationwide delivery and supported by a team of experts.

Spot Coolers

These industrial cooling products are ideal for cooling large areas within commercial and industrial applications. Providing steady streams of cooling via flexible air ducts over extended distances, cooling can be provided precisely in the area needed most. All that's required is ventilation for the exhaust hose.

Portable Split Air Conditioners

Portable Split Air Conditioning products have separate evaporator and condenser units, enabling them to produce more cooling power than standalone air conditioning products. Using a conventional power supply all that is required is an open window or door for the connecting refrigerant pipework.

Electric Fan Heaters

These compact and aesthetically pleasing fan heaters provide quick, effective and safe heating in a variety of applications, creating a powerful airflow on dual heat settings.

Electric Industrial Fan Heaters

These sturdy and robust heating products produce instant, effective and safe heating in demanding applications, creating a powerful airflow on dual heat settings.

TEMPORARY WELFARE FACILITIES

We specialise in providing temporary welfare facilities for all kinds of projects. Available in a wide variety of sizes and configurations, from 12ft mobile units to 32ft ECO cabins. All units are compatible with our clean energy products to ensure your site compound is as sustainable and cost effective as possible.

Portable Toilets - Solar Hybrid Toilets

With a clean, clear odourless flush, hot running water, plenty of light, a cosy heated interior and a top-rated environmental performance. A solar panel and battery can power this unit for over 95% of the time on site.

Portable Toilets - Serviceloos

Serviceloos are a tough, durable and self-contained portable toilet with hassle free operation. We operate a weekly service for the duration of the portable toilet hire, in compliance with all current health and safety regulations.

Static Welfare Units

Available in a standard or eco specification, these static welfare units can accommodate between 8 and 12 people. Typically equipped with separate drying room, office, canteen area, private WC, integral noise-reduced diesel generator, lighting and electrics, heating and water heaters, integral water and waste tanks and full steel anti-vandal construction.

Mobile Welfare Units

These towable units come in 12, 16 and 20ft sizes, accommodating up to ten people. They are easily towed, secured and manoeuvred on site in less than 3 minutes by one person. Mobile welfare units come equipped with a canteen area, private WC and drying room, whilst 16 and 20ft sizes also come with the option of a separate office. All sizes of welfare unit can be offered as an eco specification, powered by solar panel and battery with a back-up generator, reducing CO₂ emissions by up to 80%.

Anti-Vandal Cabins

Anti-Vandal Units can help to deter unwanted attention from opportunistic thieves. These are available in an extensive range of layouts and sizes, mainly in 21ft and 24ft. The units can also be linked and double stacked to allow for further flexibility to suit all of your requirements.

Suitable as: offices, canteens, toilets, showers, training rooms, drying rooms, meeting rooms, changing rooms, first aid rooms.

We also supply a wide range of furnishings and white goods for your units.

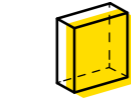

TEMPORARY WELFARE FACILITIES

Eco Cabins

Our ECO spec cabins offer a variety of environmentally friendly features, making them cheaper to run and significantly reducing the carbon footprint of your compound.

Improved insulation and double-glazing help to keep heat in and cold air out. Non-concussive taps and waterless urinals save on water consumption and PIR LED lighting saves on energy consumption and improves lighting efficiency.

All of our 32ft cabins come in ECO spec as standard.

DOUBLE GLAZED WINDOWS
(Aluminium and/or UPVC)

HEAVY DUTY EXTERNAL DOOR CLOSURES

PIR SENSORS & LED LIGHTING

WATERLESS URINALS & DUAL FLUSH WC'S

UPGRADED INSULATION

Water Usage Comparison	1,737,500 ltrs per annum	735,000 ltrs per annum	58% water saving

TOTAL SOLUTIONS FOR TRAFFIC CONTROL AND MANAGEMENT

With the largest and most modern hire fleet in the industry, we supply everything you could need for traffic management around your site.

In addition to equipment we can also provide total traffic management services to deliver every aspect of your project from start to finish. From site survey, CAD design and liaison with utilities and local authorities, through to deploying your solution on site and the ongoing management of it with our Traffic Management Operatives.

We can also supply:

- Pedestrian and vehicle crossing
- Cones, lights and barriers
- Surveys and drawings

Variable Message Signs (VMS)

We offer industry-leading, energy efficient and state-of-the-art Variable Message Signs for use around facilities, in cities and on highways.

Our team provide nationwide hire and can support with small, one-off requirements through to major schemes across the UK and Ireland on motorways and dual carriageways. With a proven track record of delivering service excellence we are well positioned to provide a complete intelligent VMS traffic management solution.

Chapter 8 Registered Class 1 & 2 Road Signs

We provide all varieties of road sign packages for use around facilities, on single and dual carriageways and motorways, subject to local authority approval. Our range includes people at work signs, directional arrows, road narrows signs, speed limit signs and many more.

TEMPORARY TRAFFIC LIGHTS

We can supply a wide range of temporary traffic lights, including multi-phase traffic lights which are available to hire in two, three and four way configurations. Using the latest battery power technology, they are radio-controlled and operate silently.

Our investment in the latest technology means we have access to innovative RC2 AutoGreen Traffic Lights, one of the most advanced portable signals available in the industry and proven to reduce journey times by up to 50%. With AutoGreen technology and Active Channel Management, the RC2 sets the standard for efficient traffic management. With 18+ day run times; it is the signal of choice.

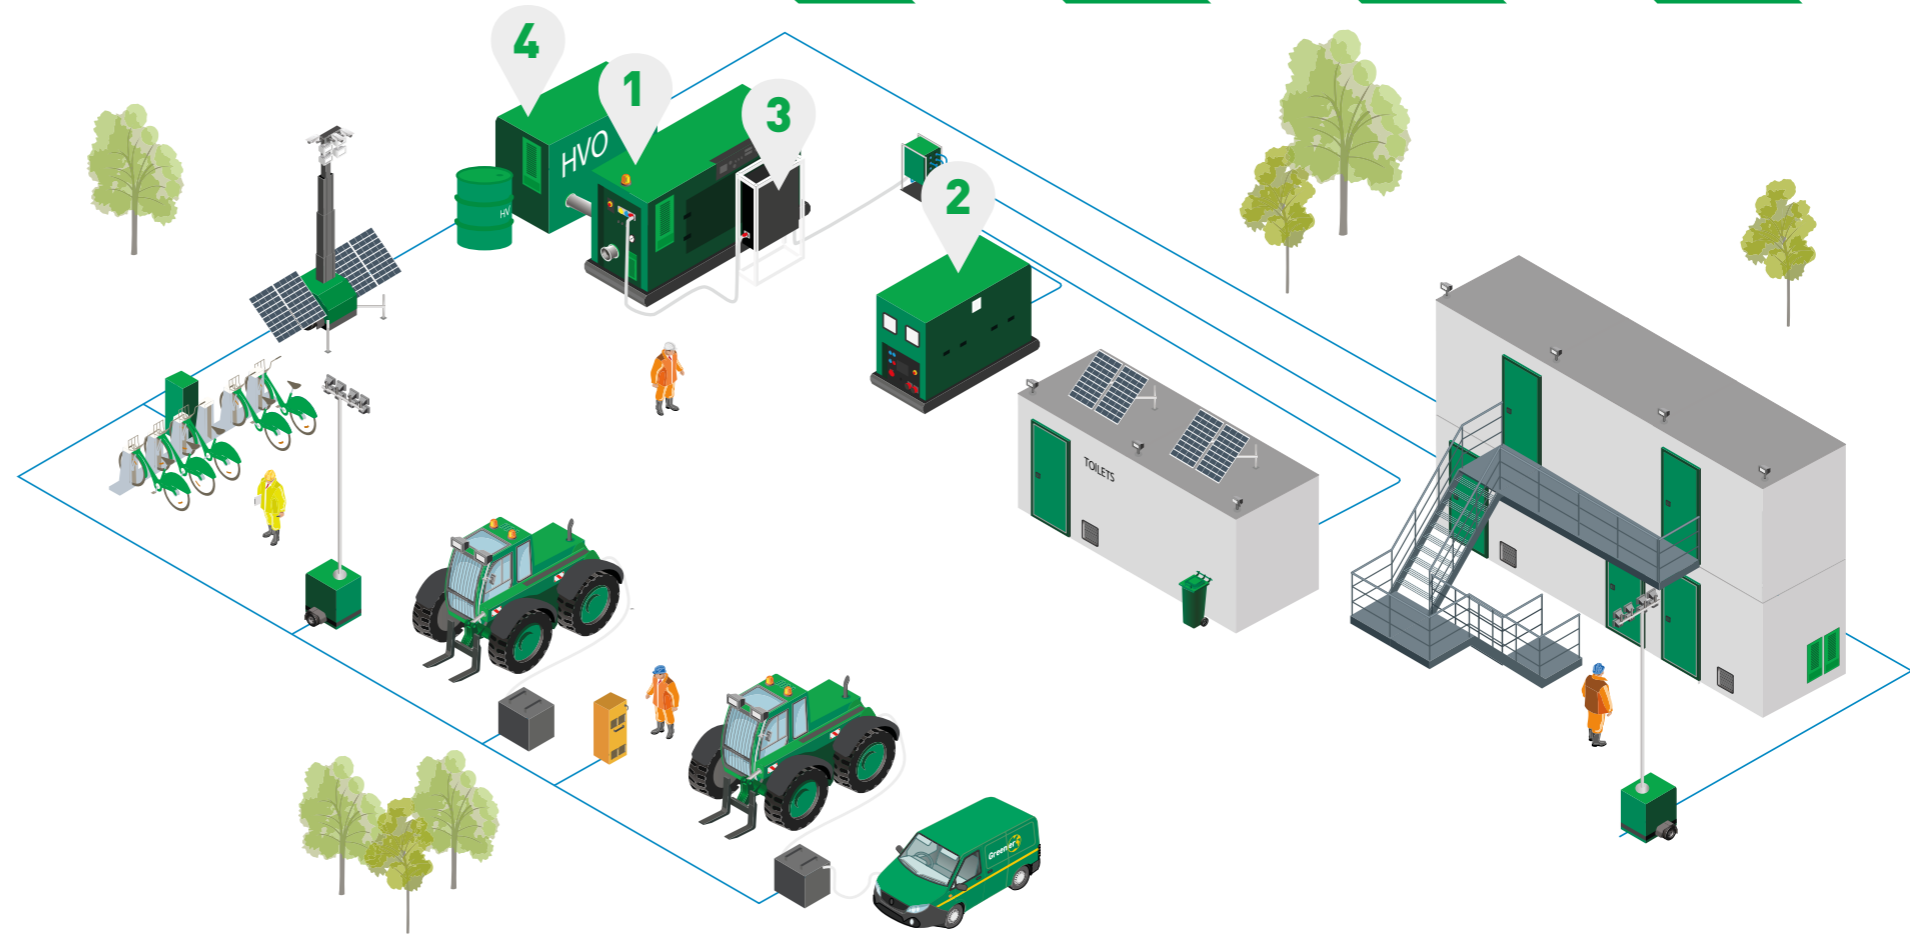

We also supply SRL's Adaptive Detection System, this is an intelligent and adaptive light that can manage daily traffic flows by making automatic adjustments of green times easily. It uses deep learning algorithms to interpret the data received from a high accuracy radar detector (traffic/volume/speed).

We understand the need for reliable equipment that is easy to set up and our range of portable traffic lights and pedestrian units meet these needs with ease.

THE ULTIMATE CLEAN ENERGY SOLUTION

Our range of Clean Energy Solutions offer a more sustainable solution to just running a diesel generator. When used in the right configuration they are proven to significantly reduce generator size, fuel consumption and therefore costs, as well as reducing emissions and improving air quality.

- Reduce tail pipe emissions and improve air quality
- Reduce fuel costs and emissions by up to 80%
- Reduce fuel costs and emissions by up to 80%
- Reduce carbon by up to net 90%

+
 +
 +

1 Stage V Generator **2 BSU** **3 EMS** **4 HVO Fuel System**

Battery Storage Unit Energy Management System

POWER

We have an extensive range of energy solutions, from 20kVA to 1250kVA generators with a wide range of models available with Stage V engines to lower emissions, to the UKs largest range of Battery Storage Units that enable you to build a hybrid power system and reduce fuel consumption by an average of 60%.

Our team of specialists offer a complete support service, from site surveys to full site installations. We also provide a comprehensive fuel management solution, with 24/7 support.

Greener Power Solutions

We offer a range of greener power solutions to help you increase your efficiency, whilst reducing your carbon footprint and keeping your costs down.

From Battery Storage Units that can be installed alongside fuel-powered generators to offer periods of silent power, to Eco Lync Energy Management Systems that allow you to monitor, control and regulate power distribution and consumption in real time, proven to deliver significant reductions in both cost and emissions.

FUEL MANAGEMENT

We offer a hassle-free managed fuel solution with next-day delivery and 24/7 service. Remote monitoring and scheduled deliveries provide an extra level of safety and security.

Running out of fuel can ground work to a halt and lead to unnecessary charges for the cleaning and restoration of generators. Our monitoring service ensures your generators are topped up at all times, with deliveries scheduled to ensure you're never without. We can also provide reports to show fuel consumption by site and a summary of the CO2 emitted via diesel to help you manage your carbon emissions.

Reducing risk is a key part of fuel management and our security measures, including alarms, help protect against overnight fuel thefts and the possible expense of refilling units.

Fuel Stations

Providing an on-site fuelling point, these stations are fitted with the latest telematics technology to track levels, record who is accessing fuel and which machine is being fuelled.

Fuel Tanks

Our fuel tanks are an efficient way to keep equipment topped up. They are fully transportable and designed to fuel up to three pieces of equipment simultaneously, saving you time and allowing you to double or triple the run times of equipment.

DOING THE RIGHT THING

Helping create a sustainable future for all

At Sunbelt Rentals, we are totally committed to acting responsibly and sustainably.

It's in our DNA; so much so that 'being responsible' is one of our core values. Everything we do is the right thing for our people, for you, for our communities and our planet.

We're committed to delivering a 10-year sustainability strategy with the aim of lowering carbon emissions, while creating a sustainable future. It's more than just an action plan and it's our blueprint for the future. As a business we are working hard to reduce our environmental impact, and that of our customers, across three key areas:

- Environment
- Governance
- Social – people & communities

Award-winning local plant maintenance apprentice, Lucy O'Rourke
