

BARRIERS AND FENCING

MESH ANTI-CLIMB FENCE

Suitable for low site security, the Mesh Anti-Climb Fence is a 2 metre high, heavy duty metal mesh, temporary fencing system.

The fence panel is manufactured from open mesh welded to tubular steel frames. Legs are provided at the foot of each panel which fit securely into a conventional concrete, or thermo plastic foot.

All the fence panels are galvanised and both pedestrian and vehicle gates are available, providing a highly flexible system for use in a variety of situations, including perimeter fencing or the creation of a secure compound to protect equipment.

We are also able to offer a range of screening materials to provide an additional layer to restrict debris, blend the fencing into its environment or provide improved privacy.

- **Suitable for**
- Demarcation
- Anti-climb perimeter fence
- Medium security fence

- **Unsuitable for**
- Crowd control
- High security fencing

- **Specification**
- Weight - 22kg + block
- Height - 2,000mm
- Width - 3,500mm
- Depth - N/A
- Carrying/Loading Capacity - N/A
- Construction - Steel

- **Benefits**
- Anti-climb
- Pedestrian and vehicle gates available
- Screening options available

FLEXIBLE SITE SECURITY FOR CREATING PERIMETER FENCING AND SECURE COMPOUNDS
